

Mines of the County

George B. Ayers and J. W. Guinn brought in a 30,000\$ bar of bullion from the Gold Road mill last Tuesday.

Work on the P. K. mines is progressing. Sinking on the main shaft is going ahead and within a short time the 100 foot will be reached, at which point levels are to be run off and the vein crosscut.

L. D. Rogers, owner of several mining claims in the Union Pass section, arrived in Kingman from Los Angeles last Monday. He is one of the directors of the Old Trail mining company, which is soon to begin active operations on several Union Pass mines.

H. F. Best and wife came in from the Treasure Hill mines Thursday morning last and departed to Humboldt and Prescott yesterday. Mr. Best will look after the sampling of a carload of rich Treasure Hill ore while in the Smelter City. This ore was taken out in drifting and sinking on the mines and is said to be of a high grade in silver.

J. R. Gamey has taken a bond on the Gladstone group of mines, at Chloride, and will soon have a hoister on the ground. The property was taken over for the interest of Mr. Gamey's brother, R. R. Gamey, of Toronto, Canada. The mines show nice bodies of ore, carrying gold, silver and lead. Much ore has been stripped from the properties by one of the owners, Frank Tufte. L. M. Teale and M. S. Cook promoted the deal.

A big White & Howell roaster is being put in the mill of the Cerbat Mountain mining company, at Cerbat. This roaster is to be used in oxidizing the zinc ore before passing it over the magnetic machines, the process making the zinc slightly magnetic. When the plant is ready for work the mill will be put to work on ores from the Idaho mine, which is capable of outputting thirty or forty tons of good grade ore daily.

The board of supervisors this week granted to the power company a franchise for a spur track from the Santa Fe main line to the power house in the west part of town. The line will be graded in the first of the week and track laid. As soon as this is done the big roof beams will be shipped from Los Angeles and will be put in place at once on their arrival. The company is now preparing the floors in the big building for the boilers and engines, this work being of a heavy character.

Anson H. Smith and a mining man visited the molybdenite mining claims, in Copper Canyon, a few days ago. The claims show immense veins of molybdenite-copper ores upon which considerable work has been done by the owners. Recently experiments have been made on these ores and a successful method of treatment has been discovered. By this method the copper and molybdenite have been separated, the separate products being brought up to a commercial standard. It is probable that the mines will soon be worked for both the copper and the molybdenite content.

The Victor mill is almost ready to go into commission, only a few finishing touches being necessary before the juice is turned on from the big power plant at Needles. The plant is one of the most modern in the territory, being equipped with a 200 ton tube mill gravity filters and every labor saving appliance that the ingenuity of the designers could suggest. The mill is to be supplied with water from a big pump station at Spear's Lake, nine miles distant, power for which is to be supplied from the main power station at Needles. The credit for this magnificent equipment is due Col. Thomas Ewing, who planned the plants throughout.

Burdon Gaylord, the well known Los Angeles mining man, arrived in Kingman a few days ago and has gone to the Big Sandy country, where he is interested in a number of mining claims. It is also understood that he has purchased the wolfram mines of Ed. Williams and partner and that work will be commenced on development within a few weeks. Considerable high grade ore has been shipped from these properties to the eastern market. Mr. Gaylord has had a few men at work in the vicinity of Crow Canyon doing location and other work on a group of mines recently located. The mines show good values in copper in the outcrop.

Changes at Goldroad.

This week the Gold Road mining company laid off between seventy-five and eighty men at the mine and for some time only enough men will be worked in the property to keep it in shape. The hoist will be kept in operation and the ore broken in the stopes will be run to the mill, that plant being kept in operation by a full force. It is estimated that enough ore is now broken in the mine to keep the mill in operation for six months or more.

It is the intention of the company to make a complete change in the machinery, both at the mine and mill, the present gasoline power being replaced by electric motors. A big hoister is to be put on the main shaft and a more modern equipment is to replace the present machinery at all points. The mill is also to be replaced by a more modern plant and when all the changes have been made the mill will have a capacity of ten thousand tons of ore monthly. This will be more than double the present capacity of the plant. It is also probable that the ores will be silmed and that a big gravity filter will be put in place of the present pressure filters. By this arrangement a greater saving will be made at less expense.

The Gold Road mine is one of the greatest gold mines in the world and the company has proven its value at a depth of 800 feet, where it shows a great vein of ore, the values of which are far richer than in any other part of the mine. The company is to sink other shafts and upraises are to be made from the deep level to the surface, here they will be equipped with electric hoisters. Everything in and about the mines and mill are to be electrized, the power coming from the big plant at Kingman. When all the changes are made at mine and mill the output of the mines will run about 200,000\$ per month.

The Expansion Gold Mining company, of which Charles J. Hutchison is general manager, is about to run an 800 foot tunnel to tap the Expansion vein at a depth of approximately 800 feet. Machinery is already on the ground and work will be under way before the first of November. Machine drills will do the work and three shifts of miners will be put on. The Expansion mine has been opened by tunnels to quite a depth and good ore has been encountered in all the openings. The vein is 175 feet wide and carries values all the way across this great width. Some of the vein material will pay well in a mill. In the lower workings rich strata were found all through the big vein. It is expected that at the lower depth water will be encountered and the ore shoots well defined. The company is well financed for the work and will be able to put in a reduction works as soon as the ore body is encountered in the lower workings.

J. D. Spargo and Joe Martinez went down to the Chemehuevi mountains last Saturday night, where they examined mining property. Mr. Spargo believes that some day that region will become one of the large mining centers of the county.

The Oro Plata mill is nearing completion and will soon be in commission. This plant is designed to work about thirty tons of ore daily.

Mrs. Ida Crozier and Mr. and Mrs. R. W. Hunt came down from Crozier Sunday evening and looked after business interests Monday.

The Mohave and Wallapai Indians are to have their big "Cry" in the Mohave valley next week. A large number of the Wallapai Indians, including Sherrin, the head chief of the tribe, are in Kingman waiting the signal to go to the "valley of tears".

The following letters remain uncalled for at the Kingman postoffice: M. M. J. O'Brien 2, Frank Miller, Miss Jennie Kinsey 2, Dick Dimm, W. C. Foster, Norris L. Fellows, J. G. Thompson, Fred Horton, Laurence Harris.

The Best Doctor.

Rev. B. C. Horton, Sulphur Springs, Texas, writes, July 19th, 1902: "I have used in my family Ballard's Snow Liniment and Horehound Syrup, and they have proved certainly satisfactory. The liniment is the best we have ever used for headache and pains. The cough syrup has been our doctor for the last eight years." Sold by Watkins Drugstore.

Phenix has struck another body blow at the saloons. This time the city council has ordained that no liquors shall be sold by saloons between the hours of twelve midnight Saturday and twelve midnight Sunday, nor shall the front door nor the back door, nor even the side door of these institutions be open to admit the thirsty wayfarer during the sabbath hours.

The board of supervisors cut off the bounty on rabbit scalps at its last session and hereafter bunnies will not be in mortal dread of the ear hunters of this county. More than two thousand ears were received, counted and paid for by the board at its session. The task of going over one by one the thousands of ill smelling ears must have been one of the causes for the action of the board, while on the other hand the payment of the bounty was really a needless expense.

Memorial.

At a regular meeting of Kingman Lodge No. 468 Benevolent and Protective Order of Elks, held Friday evening, October 4th, 1907, the following resolutions were unanimously adopted:

Resolved: That the Lodge has heard with profound sorrow of the death of Mrs. William L. Kayser, wife of our esteemed brother, William L. Kayser.

Resolved: That as a tribute to the worthy character and virtues of the lamented dead, as well as our expression of heartfelt sympathy for our bereaved brother, that a committee of three be appointed to attend the funeral, and express our sympathy with the husband and family of the deceased.

Resolved: That as a mark of respect to the memory of the deceased, all further Lodge business be suspended, and the Lodge do now adjourn.

Resolved: That the Secretary communicate these resolutions to the husband and relatives of the deceased, and cause copies to be published in the county papers.

(Seal) R. A. ROBERTSON,
Exalted Ruler.
E. F. THOMPSON,
Secretary.

The Oriental Rug as a Work of Art.

In the New Idea Woman's Magazine for November a writer on Oriental rugs says that only a few years ago they were considered art curiosities, but to-day they are far more common. Their durability and usefulness have made them popular and, as a result, interest in their beauties and a desire to know more of their history and construction are being displayed by many people. The making of Persian rugs is purely a family industry, as there are no rug factories. The men of the family watch the sheep, shear them and dye the wool. The women do most of the weaving, though often a whole family takes part in the process. The symbolism of the various designs, the value of the different weaves, according to the locality where they come from, and some facts about their transportation to the West are discussed, while some tests for the genuineness of a rug will be of benefit to the would-be purchaser. Of the illustrations some show the best-known specimens of Oriental rugs, while others portray the Eastern girls at the loom.

I have the finest samples of wall papers ever brought to Kingman. People contemplating the repapering of their houses should call and make selections. Have also a splendid line of burlaps. ROBERT ROSCO.

A Most Worthy Article.

When an article has been on the market for years and gains friends every year, it is safe to call this medicine a worthy one. Such is Ballard's Horehound Syrup. It positively cures coughs and all Pulmonary diseases. One of the best known merchants in Mobile, Ala., says: "For five years my family has not been troubled with the winter coughs, we owe this to Ballard's Horehound Syrup. I know it has saved my children from many sick spells."—Sold by Watkins Drugstore.

Notice.

After October 9th, 1907, the bounty on Jack Rabbits killed in Mohave county will cease.

By order Board of Supervisors.
JOHN S. KOLAR, Chairman.

Brewers Lost the Fight in Kansas.

A Topeka, Kan., dispatch says: Seven brewing companies have given up the fight in Kansas, and agreed to pay the cost of cases against them, and move out of the state. When Attorney General Jackson started the fight there were sixteen big companies doing business in Kansas. All have given up but four.

Mr. and Mrs. O'Brien are late arrivals in Kingman from Los Angeles. Mr. O'Brien has charge of the Sauls barber shop on Front street.

Mine Warning Notice.

To Whom It May Concern: Notice is hereby given that the Vanderbilt mine, situated in the Wallapai mining district, Mohave county, Arizona, is under lease to parties working the same, and that neither the mine nor the owner thereof will be responsible for any labor or debt contracted, nor injuries sustained by any employer or employee in working said property and that no employer or employee is the agent of the owner for any purpose, and that all operatives engage in such service at their own risk, and that no debt or claim of debt is valid against said mining claim or their owner.

CEDAR VALLEY MINING COMPANY,
Cebat, Arizona, Oct. 1, 1907.

Mine Warning Notice.

To Whom It May Concern: Notice is hereby given that the Silver Queen mine and millsite claims, designated by the Surveyor General as lots No. 1219 and 1219 B; the Evangelist Lake mining claim, designated by the Surveyor General as lot No. 1218; the Arnold lode mining claim designated by the Surveyor General as lot No. 40; the General Lee lode mining claim, designated by the Surveyor General as lot No. 39; the Hubbard Lode Consolidated mining claim, designated by the Surveyor General as lot No. 11, and the Prince, Dire Necessity, Cricket, Tough Nut, White Cross and Live Yankee mining claims, situated in Cedar Valley mining district, Mohave County, Arizona Territory, are being worked under contract agreement, and that neither the said mines or mining claims or buildings, mills, machinery, implements, fixtures or improvements made or to be made thereon or thereon, or any property of the Cedar Valley Mining Company, or the undersigned owners thereof will be liable or responsible for any labor, material or debt contracted, or injuries sustained by any employer or employee in working or improving said properties; and that no employer or employee is the agent of the owner for any purpose, and that all operatives engage in such service at their own risk, and that no debt or claim of debt is valid against said mines or mining claims or property, or the owners thereof.
